My Portfolio

Professional Summary

UI/UX Designer with hands-on experience designing and developing enterprise **web applications** in the **telecommunications** and networking domain. Skilled in **Figma**, **UI design**, **wireframing**, **prototyping**, **responsive design**, **HTML**, **CSS**, **JavaScript**, **React** and **Angular**. Experienced in translating business and technical requirements into user-focused interfaces, dashboards, and **reusable components**. Strong understanding of the **design-to-development** lifecycle, with the ability to independently take projects from **requirement analysis** and UI design through **frontend development** and deliver functional, responsive web applications.

Professional Experiences

UI/UX Designer

(Feb 2026 - Present)

TestYantra Software Solutions Pvt. Ltd. | Client: Tierone OSS Solutions

- Delivered **5+ enterprise application modules** from requirement analysis to **UI implementation**, converting 20+ **functional requirements** into responsive interfaces for **telecommunications and networking workflows**.
- Designed **30+ UI screens** and **reusable components in Figma**, establishing consistent patterns for **dashboards, data tables, navigation, forms, and interactive workflows** across multiple modules..
- Implemented **20+** frontend screens and **interactive components** using **Angular**, **HTML, CSS, and JavaScript**, translating Figma designs into functional responsive applications and reducing **design-to-development gaps**.

UI Designer

(Feb 2023 - Jan 2026)

Fosters Technologies Private Limited, Bengaluru, Karnataka

- Designed **25+ user interface screens** for web applications, translating **business requirements** and functional specifications into **structured, user-friendly experiences** across multiple **application workflows**.
- Developed **15+ wireframes**, **high-fidelity screens, prototypes, and visual layouts,** maintaining consistency across typography, spacing, navigation, **visual hierarchy**, and **reusable UI components**.

Projects

IoT Observability Dashboard – Enterprise IoT monitoring and observability platform

- Designed an **interactive dashboard** to monitor 1M + IoT devices, visualize device health, and identify critical issues in real time.
- Developed **data-driven UI components** for device status monitoring, KPI analytics, alerts, and device-level insights.
- Improved **information hierarchy** reusable UI components, and **responsive design**.

BreakFit – Breakfast Ordering App with an end-to-End **UX Case Study**

- Built a mobile app solving the “no time for breakfast” problem for all users.
- Sketched 5+ **user flows**, 20+ **wireframes**, and 15+ **high-fidelity screens**.

VALIDATE is a consent-based background verification platform

- Designed a dual-user system with a **mobile app** for data providers and a **web dashboard** for verifiers.
- Enabled real-time verification status, approval, rejection, resubmission workflows.

- Case study : Breakfit-cd
- Dashboard : IoT
- Case study : IoT-cd

DESIGN SKILLS

- Interaction design
- UX Research
- correlation research
- Psychology testing
- Information Architecture
- User Flows
- Design Thinking
- Usability Principles
- Quantitative research
- Visual hierarchy
- Case study

DEVELOPMENT SKILLS

- HTML5
- CSS3
- JavaScript
- Angular
- TypeScript
- Responsive Development
- Frontend Development
- Design Thinking
- GitHub
- Figma
- VS Code
- React
